

Irene Rubio

Frontend · UX · Accessibility

Frontend developer combining technical skills with a creative background in visual production and digital communication. Experienced in agile development in cross-functional teams with high demands on quality, accessibility and user experience.

At home in modern JavaScript frameworks as React, Angular and TypeScript, and in the whole chain from design to deployment. Currently broadening my profile with C# and .NET. I work best where technology and creativity meet.

EXPERIENCE

Frontend Developer

Nov 2025 – Jun 2026

Arbetsförmedlingen (Swedish Public Employment Service) · Stockholm

- Worked in agile cross-functional teams, applying Scrum practices across the full product lifecycle — from early design discussions to production deployment.
- Feature development, debugging and maintenance in Angular and TypeScript on the internal design system.
- Proposed and carried out a refactoring of the codebase, splitting an oversized file into maintainable components.
- Automated E2E testing with Playwright and Vitest; CI/CD in OpenShift and ArgoCD.
- Identified UX inconsistencies and accessibility issues, documented findings and presented improvement proposals.

CEO & Creative Director

2009 – 2020

Cordelia, fashion and vintage brand · Madrid

- Founded and ran my own fashion and vintage brand for over ten years, with a physical store and online sales.
- Full responsibility for digital communication, marketing, campaigns, photography and customer relations.
